DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on March 7, 2008 has been entered.
2. Claims **1, 2, 4-19** and **21-34** are pending in this application.

Information Disclosure Statement

3. The information disclosure statement (IDS) submitted on March 7, 2008 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Examiner's Amendment

4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in the interview with Mr. James Leiz on December 17, 2007.

Amending claims 18, 24, and 25 as the following:

18. A system for wagering on a future race using an interactive wagering system, comprising:

at least one totalisator configured to run a first parimutuel wagering pool for the future race~~[[;]]~~ and a second parimutuel wagering pool for the future race, wherein (a) the second parimutuel wagering pool is separate from the first parimutuel wagering pool whereby odds of the first parimutuel are calculated using only wagers placed in the first parimutuel wagering pool and odds of the second parimutuel wagering pool are calculated using only wagers placed in the second parimutuel wagering pool, (b) the first and second parimutuel wagering pools accept wagers of the same selected type, and (c) the second parimutuel wagering pool closes after the first parimutuel wagering pool closes; and

user equipment configured to:

provide the user with the ability to place a wager in the first parimutuel wagering pool for the future race; and

provide the user with the ability to select a wager type for the wager from a plurality of different wager types.

24. The system defined in claim 18 ~~further comprising a~~ wherein the at least one totalisator is configured to (a) calculate the odds and payouts for the first parimutuel wagering pool while the first parimutuel wagering pool is open and (b) calculate the odds and payouts for the second parimutuel wagering pool while the second parimutuel wagering pool is open.

25. The system defined in claim 24 wherein the at least one totalisator is further configured to (a) fix the odds and payouts for the first parimutuel wagering pool when the first parimutuel wagering pool closes and (b) fix the odds and payouts for the second parimutuel wagering pool when the second parimutuel wagering pool closes.

Allowable Subject Matter/Reasons for Allowance

5. Claims **1** and **18** are allowed over the prior arts cited records.

The closest prior arts are:

1) Mindes (US 5,842,921) discloses a system for balancing betting pools. This is accomplished by controlling the terms such as betting odds and/or handicaps for the contestants such that bettors are encouraged to place bets that will bring the betting pools into balance. See, e.g., column 4, lines 7-17.

2) Van Horn (US 6,631,356) discloses an "on-line buying co-op" that is formed for the specific purpose of purchasing a particular product by defining a start time, end time, critical mass, any minimum number of units offered, any maximum number of units offered, starting price and product cost curve" (Abstract). Van Horn has absolutely nothing to do with wagering on future races.

Neither Mindes nor Van Horn shows or suggests selecting a wager type for the wager from a plurality of wager types and providing two separate parimutuel wagering pools where odds of the first parimutuel wagering pool are calculated using only wagers placed in the first parimutuel wagering pool and odds of the second

Art Unit: 3692

parimutuel wagering pool are calculated using only wagers placed in the second parimutuel wagering pool, and where the first and second parimutuel wagering pools accept wagers of the same selected wager type and the second parimutuel wagering pool closes after the first parimutuel wagering pool closes, as specified in independent claims 1 and 18.

Therefore, it is clear from the description of Mindes's and Van Horn's inventions that the prior arts do not considered the possibility of: a second parimutuel wagering pool for the future race, wherein (a) the second parimutuel wagering pool is separate from the first parimutuel wagering pool whereby odds of the first parimutuel are calculated using only wagers placed in the first parimutuel wagering pool and odds of the second parimutuel wagering pool are calculated using only wagers placed in the second parimutuel wagering pool, (b) the first and second parimutuel wagering pools accept wagers of the same selected type, and (c) the second parimutuel wagering pool closes after the first parimutuel wagering pool closes, as included in claims 1 and 18.

6. Claims (2, 4-17) and (19, 21-34), are allowed because they are dependent claims of the allowable independent claims 1 and 18 above, in that order.

Conclusion

7. Claims **1, 2, 4-19** and **21-34** are allowed.
